

Correction

Saxena A, Mehta A, Ramakrishnan S, *et al.* Pulse oximetry as a screening tool for detecting major congenital heart defects in Indian newborns (*Arch Dis Child Fetal Neonatal Ed* 2015;100:F416–21). The authors have pointed out that there was an error in [figure 1](#). The original [figure 1](#) shows a saturation cut off of 92%. However, the authors later revised the figure to show a cut off to 95% but this one was not used. The correct figure is now published.

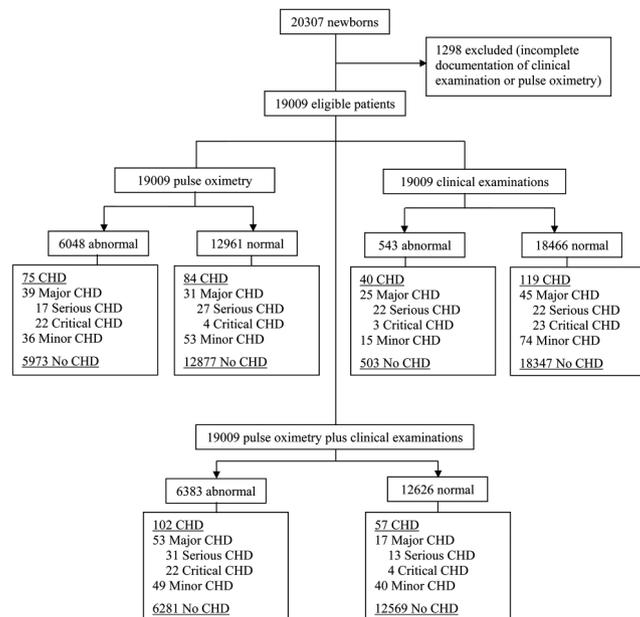

Figure 1 Study profile. CHD: congenital heart defect.
