Pichler G, Pocivalnik M, Riedl R, *et al.* C reactive protein: impact on peripheral tissue oxygenation and perfusion in neonates (*Arch Dis Child Fetal Neonatal Ed* 2012;97:F444–8). The authors of this paper have asked us to point out that there is an error concerning the units in which C-reactive protein (CRP) is measured. The unit for CRP in the abstract is correct with mg/l. However, the unit for CRP in the body of the paper is not correct – it should also be mg/l (Methods, Results, table 1). In table 2 there should be no unit of CRP because there are no CRP levels mentioned.
