Correction

Saxena A, Mehta A, Ramakrishnan S, et al. Pulse oximetry as a screening tool for detecting major congenital heart defects in Indian newborns (Arch Dis Child Fetal Neonatal Ed 2015;100:F416–21). The authors have pointed out that there was an error in figure 1. The original figure 1 shows a saturation cut off of 92%. However, the authors later revised the figure to show a cut off to 95% but this one was not used. The correct figure is now published.

**Figure 1** Study profile. CHD: congenital heart defect.
