

**Supplemental Table: Echocardiogram assessments**

<b>Characteristic</b>	<b>Trial Participants (n=18)</b>	<b>Historical Control (n=18)</b>
Estimated right ventricular pressure above right atrium (mm Hg), median (IQR)	51 (41, 54) (n=11)	49 (39, 50) (n=11)
Direction of shunting at ductus arteriosus		
Left to right	0	2
Bidirectional	14	8
Right to left	3	8
No patent ductus arteriosus	1	0
Interventricular septal position		
Flattened	7	11
Bowing	11	7
Severity of pulmonary hypertension*		
Mild	0	1
Moderate	6	7
Severe	12	10

IQR: interquartile range

\*Based on the most severe assessment across all three assessments
