

NEW BOOKS FOR PAEDIATRICIANS

NEONATAL RESPIRATORY DISORDERS

Anne Greenough, N R C Robertson and Anthony Milner

Comprehensive in scope and with contributions from leading experts, this important new book will quickly become established as the standard reference work on disorders of the lungs and respiratory tract.

- Covers all aspects of aetiology, diagnosis and treatment
- Provides detailed reviews of the many components of the management of all neonates in intensive care
- Well illustrated with 96 line diagrams and 114 photographs

November 1995 528pp HB 0 340 55242 5 £95.00

A MANUAL OF NORMAL NEONATAL CARE 2nd Edition

N R C Robertson

'This book is the perfect manual for all those who are involved in neonatal care.' *Acta Paediatrica Scandinavica* (of the first edition)

- A practical, pocket-sized guide to management of newborn infants
- Thoroughly revised to reflect recent trends and developments in modern neonatal care, such as the increase in the number of home births and a greater knowledge of the effects of maternal infection
- Incorporates new legislation and the most recent, relevant references

March 1996 c.384pp PVC Cover 0 340 61375 0 c.£14.99

CHILDREN'S MEDICINE AND SURGERY

Forrester Cockburn, Robert Carachi, Krishna M Goel and Daniel G Young

- A successor to Hutchinson and Cockburn's *Practical Paediatric Problems*
- Extensively illustrated with 120 colour photographs, 130 black and white photographs and 51 line illustrations
- Modern four-colour text design
- Comprehensive, encompassing the range of paediatric medical and surgical problems
- Authors from Glasgow's internationally renowned children's hospital

November 1995 PB 560pp 0 340 55143 7 £39.50

PRESCRIBING INFORMATION

Presentations: Pulmicort

Respules: (2ml single dose unit ampoules) containing 0.25mg/ml or 0.5mg/ml budesonide in a suspension for nebulisation. **Uses:** Bronchial asthma where use of a pressurised inhaler or dry

powder formulation is unsatisfactory or inappropriate. **Dosage and administration:** Dosage schedules.

Administer from suitable nebulisers. Dose delivered to the patient varies depending on the nebulising equipment used (see data sheet). Adjust dosage individually. Initially during periods of severe asthma and while reducing or discontinuing oral glucocorticosteroids the recommended dose in adults (including elderly and children 12 years and older) is usually 4-2mg twice daily. In very severe cases the dosage may be further increased. Children 3 months to 12 years: 0.5-1mg twice daily. The maintenance dose should be the lowest dose which keeps the patient symptom free. Recommended doses are: Adults (including elderly and children 12 years and older): 0.5-1mg twice daily. Children 3 months to 12 years: 0.25-0.5mg twice daily. For an increased therapeutic effect increase dose of Pulmicort rather than combine treatment with oral corticosteroids because of the lower risk of systemic effects. **Contraindications, warnings, etc:** Contra-

indications: Hypersensitivity to any of the constituents. Special warnings and precautions: Care is needed in patients with pulmonary tuberculosis and viral infections in the airways. A short course of oral steroids in addition to Pulmicort may be required in patients with excessive mucus in the bronchi. Transfer of patients dependent on oral steroids to Pulmicort demands special care; see data sheet for further details. The nebuliser chamber should be cleaned and dried after every administration. Pulmicort does not affect the ability to drive and use machines. Pulmicort Respules can be mixed with 0.9% saline and with solutions of terbutaline, salbutamol, sodium cromoglycate or ipratropium bromide. **Side-effects:** Mild irritation in the throat, coughing and hoarseness and oral candidiasis have been reported. In rare cases inhaled drugs may provoke bronchoconstriction in hyperreactive patients. Facial skin should be washed after use of the face mask as irritation can occur. Coughing can usually be prevented by inhaling a β_2 -agonist (e.g. terbutaline) 5-10 minutes before instillation of Pulmicort Respules. Avoid in pregnancy. **Pharmaceutical**

precautions: Store below 30°C. Use within 3 months of opening the foil envelope. Protect opened ampoule from light. Use within 12 hours of opening. **Legal status:** POM. **Basic NHS price:** Pulmicort Respules 0.25mg/ml (20 single dose units): £32.00. Pulmicort Respules 0.5mg/ml (20 single dose units): £44.64. **Product licence nos.:** Pulmicort Respules 0.25mg/ml PL 0017/0509. Pulmicort Respules 0.5mg/ml PL 0017/0510.
