Subject index

airway resistance, In vitro comparison of nasal continuous positive airway pressure devices for neonates, F42
alarm limits, Detection of hyperoxygenia in neonates: data from three new pulse oximeters, F217
alkaline phosphatase, Bone mineralisation in premature infants cannot be predicted from serum alkaline phosphatase or serum phosphate, F135
alloimmune thrombocytopenia, Repeated antenatal intracranial haemorrhage: magnetic resonance imaging in a fetus with alloimmune thrombocytopenia, F222
antibiotics, Multidrug resistant neonatal sepsis in Peshawar, Pakistan, F52
Neonatal sepsis in Peshawar, F233
antrum, Patterns of antropyloric motility in fed healthy preterm infants, F95
arousal, Effects of maternal tobacco smoking, sleeping position, and sleep state on arousal in healthy term infants, F100
arteriovenous malformation, Neonatal pulmonary arteriovenous malformation in hereditary haemorrhagic telangiectasia, F226
aspiration pneumonia, Aspiration pneumonia in association with Down’s syndrome, F232
atrium, Placement of neonatal central venous catheter tips: is the right atrium so dangerous?, F155
autonomic nervous system, Central and autonomic system signs with in utero drug exposure, F106
bacteremia, Blood cultures in newborns and children: optimising an everyday test, F25
behalvoural problems, Population based, controlled study of behavioural problems and psychiatric disorders in low birthweight children at 11 years of age, F128
bench marking, Bench marking and performance management in neonatal care: easier said than done!, F163
birth weight, Reduced birth weight in boys with hypospadias: an index of androgen dysfunction?, F150
blood cultures, Blood cultures in newborns and children: optimising an everyday test, F25
blood flow, Which to measure, systemic or organ blood flow? Middle cerebral artery and superior vena cava flow in very preterm infants, F181
bloodstream infection, Prenatal diagnosis of structural heart disease: does it make a difference to survival?, F19
bone mineral content, Bone mineralisation in premature infants cannot be predicted from serum alkaline phosphatase or serum phosphate, F135
Boyd-Orr cohort, Association between breast feeding and growth: the Boyd-Orr cohort study, F193
boys, Reduced birth weight in boys with hypospadias: an index of androgen dysfunction?, F150
brain injury, Blood cultures in newborns and children: optimising an everyday test, F25
brain oxygenation, Cerebral tissue oxygenation index in very preterm infants, F189
breast feeding, Association between breast feeding and growth: the Boyd-Orr cohort study, F193
breathlessness, Hypothesising the first few days: is the incidence rising?, F158
Plasma glucose levels in term infants who are appropriate size for gestation and exclusively breast fed, F46
breast milk, Cytomegalovirus transmission from breast milk in premature babies: does it matter?, F75
breast milk, Cytomegalovirus transmission from breast milk in premature infants: a three year follow up of preterm infants after moderately early treatment with dexamethasone, F55
briere respiratory failure, Dihetics in CLD, F232
Growth effects of systemic versus inhaled steroids in chronic lung disease, F95
Management issues in CLD of prematurity, F2
Monitoring cardiovascular function in infants with chronic lung disease of prematurity, F15
Oxygen therapy for infants with chronic lung disease, F11
Randomised double blind placebo controlled trial of inhaled fluticasone propionate in infants with chronic lung disease, F62
Update on modalities of mechanical ventilators, F3
clinical governance, A confidential enquiry into cases of neonatal encephalopathy, F176
coarctation of the aorta, Poor outcome of very low birthweight babies with serious congenital heart disease, F31
cocaïne, Central and autonomic system signs with in utero drug exposure, F106
community neonatal service, Impact of community neonatal services: a multicentre survey, F204
confidential enquiry, A confidential enquiry into cases of neonatal encephalopathy, F176
glue heart disease, Poor outcome of very low birthweight babies with serious congenital heart disease, F31
Routine pulse oximetry in the asymptomatic newborn, F83
convection, Hypothesising waiting for proof: unswapping neonates for transfer, F232
counselling, Characterising doctor-parent communication in counselling for impending preterm delivery, F113
cytomegalovirus transmission from breast milk in premature babies: does it matter?, F75
dehydratation, Hyponatraemia in the first few days: is the incidence rising?, F158
developing countries, Multidrug resistant neonatal sepsis in Peshawar, Pakistan, F52
Neonatal sepsis in Peshawar, F233
dexamethasone, A three year follow up of preterm infants after moderately early treatment with dexamethasone, F55
diagnosis, Diagnosis of Down’s syndrome in neonates, F220
Diet, Follow up of fetal outcome in cases of maternal phenylketonuria in Northern Ireland, F141
dosage regimen, Dose regimen for vancomycin not needing serum peak levels?, F214
double blind, Randomised double blind placebo controlled trial of inhaled fluticasone propionate in infants with chronic lung disease, F62
Down’s syndrome, Diagnosis of Down’s syndrome in neonates, F220
drug monitoring, Dose regimen for vancomycin not needing serum peak levels?, F214
dual energy x ray absorptiometry Bone mineralisation in premature infants cannot be predicted from serum alkaline phosphatase or serum phosphate, F133
diaphragm, Clinical course and medical management of neonates with severe cardiac failure related to vein of Galen malformation, F144
Neonatal pulmonary arteriovenous malformation in hereditary haemorrhagic telangiectasia, F226
encephaloclastic porencephaly, Blood cultures in newborns and children: optimising an everyday test, F25
diabetes, Diagnosing diabetes type 1 and 2 in neonates: a multicentre survey, F11
inhaled fluticasone propionate in infants with chronic lung disease of prematurity, F15
Inhaled fluticasone propionate in infants with chronic lung disease of prematurity, F15
briere respiratory failure, Dihetics in CLD, F232
Growth effects of systemic versus inhaled steroids in chronic lung disease, F95
Management issues in CLD of prematurity, F2
Monitoring cardiovascular function in infants with chronic lung disease of prematurity, F15
Oxygen therapy for infants with chronic lung disease, F11
Randomised double blind placebo controlled trial of inhaled fluticasone propionate in infants with chronic lung disease, F62
Update on modalities of mechanical ventilators, F3
diabetes, Diagnosing diabetes type 1 and 2 in neonates: a multicentre survey, F11
inhaled fluticasone propionate in infants with chronic lung disease of prematurity, F15
Inhaled fluticasone propionate in infants with chronic lung disease of prematurity, F15
encephaloclastic porencephaly, Blood cultures in newborns and children: optimising an everyday test, F25
diabetes, Diagnosing diabetes type 1 and 2 in neonates: a multicentre survey, F11
inhaled fluticasone propionate in infants with chronic lung disease of prematurity, F15
Inhaled fluticasone propionate in infants with chronic lung disease of prematurity, F15
encephaloclastic porencephaly, Blood cultures in newborns and children: optimising an everyday test, F25
diabetes, Diagnosing diabetes type 1 and 2 in neonates: a multicentre survey, F11
inhaled fluticasone propionate in infants with chronic lung disease of prematurity, F15
Inhaled fluticasone propionate in infants with chronic lung disease of prematurity, F15
encephaloclastic porencephaly, Blood cultures in newborns and children: optimising an everyday test, F25
diabetes, Diagnosing diabetes type 1 and 2 in neonates: a multicentre survey, F11
inhaled fluticasone propionate in infants with chronic lung disease of prematurity, F15
Inhaled fluticasone propionate in infants with chronic lung disease of prematurity, F15
encephaloclastic porencephaly, Blood cultures in newborns and children: optimising an everyday test, F25
diabetes, Diagnosing diabetes type 1 and 2 in neonates: a multicentre survey, F11
inhaled fluticasone propionate in infants with chronic lung disease of prematurity, F15
Inhaled fluticasone propionate in infants with chronic lung disease of prematurity, F15
encephaloclastic porencephaly, Blood cultures in newborns and children: optimising an everyday test, F25
portal vein thrombosis, Portal vein thrombosis causing neonatal cerebral infarction, F125
positive pressure respiration, In vitro comparison of nasal continuous positive airway pressure devices for neonates, F42
posthaemorrhagic hydrocephalus, Procollagen I C-propeptide in the cerebrospinal fluid of neonates with posthaemorrhagic hydrocephalus, F34
posthaemorraghic, progressive ventricular dilatation, Posthaemorrhagic ventricular dilatation in the premature infant: natural history and predictors of outcome, F37
postnatal steroids, A three year follow up of preterm infants after moderately early treatment with dexamethasone, F55
posture, Effect of head up tilting on oxygenation, F233
pregnancy, Follow up of fetal outcome in cases of maternal phenylketonuria in Northern Ireland, F141
premature, Effect of salt supplementation of newborn premature infants on neurodevelopmental outcome at 10–13 years of age, F234
monitoring cardiovascular function in infants with chronic lung disease of prematurity, F15
oxygen therapy for infants with chronic lung disease, F11
prematurity, Cyanomegalovirus transmission from breast milk in premature babies: does it matter?, F75
diuretics in CLD, F232
management issues in CLD of prematurity, F2
update on modalities of mechanical ventilators, F3
prenatal congenital heart disease, Monitoring cardiovascular function in infants with chronic lung disease of prematurity, F15
preterm, intracranial pressure and cerebral blood flow velocity in preterm infants with posthaemorrhagic ventricular dilatation, F185
preterm delivery, Characterising doctor-parent communication in counselling for impending preterm delivery, F113
procollagen I C-propeptide, Procollagen I C-propeptide in the cerebrospinal fluid of neonates with posthaemorrhagic hydrocephalus, F34
psychiatric disorders, Population based, controlled study of behavioural problems and psychiatric disorders in low birthweight children at 11 years of age, F128
pulmonary, Neonatal pulmonary arteriovenous malformation in hereditary haemorrhagic telangiectasia, F226
pulmonary hypertension, Measurement of right ventricular volume in healthy term and preterm neonates, F89
monitoring cardiovascular function in infants with chronic lung disease of prematurity, F15
pulsoximetry, Detection of hyperoxaemia in neonates: data from three new pulse oximeters, F217
pylorus, Patterns of antropyloric motility in fed healthy preterm infants, F95
quality control, Bench marking and performance management in neonatal care: easier said than done?, F163
randomised, Randomised double blind placebo controlled trial of inhaled fluticasone propionate in infants with chronic lung disease, F62
readmission, Impact of community neonatal services: a multicentre study, F204
reproductive decision making, Is there a ‘right not to be born’? Reproductive decision making, options and the right to information, F72
respiration, Diuretics in CLD, F232
management issues in CLD of prematurity, F2
role of lung function testing in the management of mechanically ventilated infants, F7
respiratory disorders, Measurement of right ventricular volume in healthy term and preterm neonates, F89
respiratory muscle strength, Effect of head up tilting on oxygenation, F233
respiratory problems, Aspiration pneumonia in association with oral vitamin K, F235
retinopathy of prematurity, Oxygen therapy for infants with chronic lung disease, F11
retinopathy of prematurity, Recent advances in our understanding, F78
retropharyngeal abscess, A case of neonatal stridor, F224
rhesus isomunisation, Treatment requirements of infants with rhesus isomunisation within a geographically defined area, F202
right not to be born, Is there a ‘right not to be born’? Reproductive decision making, options and the right to information, F72
right to information, Is there a ‘right not to be born’? Reproductive decision making, options and the right to information, F72
right ventricle, Measurement of right ventricular volume in healthy term and preterm neonates, F98
salt supplementation, Effect of salt supplementation of newborn premature infants on neurodevelopmental outcome at 10–13 years of age, F234
screening, A comparison of transcutaneous bilirubinometers: SpectrRx Bilicheck versus Minolta AirShields, F137
routine pulse oximetry in the asymptomatic newborn, F83
sepsis, Blood cultures in newborns and children: optimising an everyday test, F25
Dose regimen for vancomycin not needing serum peak levels?, F214
multidrug resistant neonatal sepsis in Peshawar, Pakistan, F52
shaken baby syndrome, Blood cultures in newborns and children: optimising an everyday test, F25
sleep, Effects of maternal tobacco smoking, sleeping position, and sleep state on arousal in healthy term infants, F100
sodium, Effect of salt supplementation of newborn premature infants on neurodevelopmental outcome at 10–13 years of age, F234
steroids, Growth effects of systemic versus inhaled steroids in chronic lung disease, F59
stillbirths, A confidential enquiry into cases of neonatal encephalopathy, F176
sudden infant death syndrome, Comparative epidemiology of sudden infant death syndrome and sudden intrauterine unexplained death, F118
Effects of maternal tobacco smoking, sleeping position, and sleep state on arousal in healthy term infants, F100
sudden intrauterine unexplained death, Comparative epidemiology of sudden infant death syndrome and sudden intrauterine unexplained death, F118
superior vena cava, Which to measure, systemic or organ blood flow? Middle cerebral artery and superior vena cava flow in very preterm infants, F181
superior vena cava syndrome, Percutaneous endovascular catheter aspiration thrombectomy of severe superior vena cava syndrome, F64
term, Plasma glucose levels in term infants who are appropriate size for gestation and exclusively breast fed, F46
thromboembolism, Portal vein thrombosis causing neonatal cerebral infarction, F125
thrombolytic therapy, Percutaneous endovascular catheter aspiration thrombectomy of severe superior vena cava syndrome, F64
thyroid, Neonatal thyroid disorders, F165
tissue oxygenation index, Cerebral tissue oxygenation index in very premature infants, F189
toxicity, Dose regimen for vancomycin not needing serum peak levels?, F214
vancomycin, Dose regimen for vancomycin not needing serum peak levels?, F214
vein of Galen malformation, Clinical course and medical management of neonates with severe cardiac failure related to vein of Galen malformation, F144
ventilation, Role of lung function testing in the management of mechanically ventilated infants, F7
ventilators, Update on modalities of mechanical ventilators, F3
ventricular septal defect, Poor outcome of very low birthweight babies with serious congenital heart disease, F31
ventricular volume, Measurement of right ventricular volume in healthy term and preterm neonates, F89
ventriculoperitoneal shunt, Posthaemorrhagic ventricular dilatation in the premature infant: natural history and predictors of outcome, F37
very low birth weight, Poor outcome of very low birthweight babies with serious congenital heart disease, F31
vitamin K, Aspiration pneumonia in association with oral vitamin K, F232
wrapping, Hypothesis waiting for proof: unwrapping neonates for transfer, F232
zinc protoporphyrin/haem ratio, Zinc protoporphyrin/haem ratio and plasma ferritin in preterm infants, F49
