Supplementary Table: The correlation between Bayley-III subscales and EEG grades of preterm infants measured at EEG-1, EEG-32 and EEG-35 (normal EEG grade, mild EEG grade, moderate EEG grade, and severe EEG grade). Key: \( r_s \), Spearman's rank correlation coefficient, values are presented as \( r_s \) (95% CI).

\( ^a \) \( P < 0.05 \), significantly different from 0.
